Title: Method and system for creating, using and modifying multifunctional™ website hotspots (ClickVideoShop™)

Purpose: To provide interaction with and through video, audio, and digital media by utilizing a mode control bar of "Multi-functional Hotspots™" within digital media, to control and use Grid-Networks, for communication, commerce, & efficient process flow to achieve ambidextrous organizations on globally accessible networks, such as WWW.

Description: A software module for creating, using and modifying multifunctional website hotspots by utilizing a mode-control bar. I conceived of the invention (CVSSW™) while working to integrate the new computer system (TDC3000) into the existing process control system at Dow Chem. Co. in Jan. - Feb. 1996.

"MULTIFUNCTIONAL HotSpots™" Red, Gold, Green

Ramifications: Multi-functional Hotspots™ can be programmed to have a plurality of functions, and are efficiently and effectively controlled by a mode control bar (as referenced in representative module 1).

Possible Novel Features: Can comprise an apparatus or software module which controls and uses Grid Networks, for communication, commerce, & efficient process flow; achieving an ambidextrous unit or organization on a globally accessible network, such as W W W.

Advantages: With The Internet Generation on the rise, and the explosion of the bandwidth bottleneck in a microwave society, it will be essential for the business world to add breadth and width to todays' and tomorrow's venues. In this "New Wave" where digital information superhighways are paved directly into consumers homes, offices, and everyday lives, it becomes crucial to map an entertainment network, and B2B2C organizations that gives control to the user by adding immersive interactivity to the scope of "The Old Way of Doing Things." CVSSW™, provides these advantages to The International Theatre.

Title : Method and system for creating, using and modifying multifunctional™ website hotspots (ClickVideoShop™)—  
BUILDING & TESTING.

Reference : Conception recorded via declaration, &  
on pages (1-3)

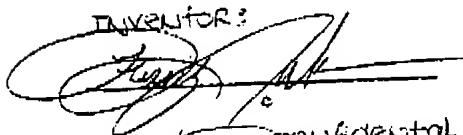

Description : • A feasibility prototype of the CTSW™ software was completed October 1999, by Stephen A. Benedict, an independent contractor of COOLNetwork.

reference module 1 : For a representative view of the feasibility prototype.

- A provisional application was filed JUNE 8, 2000.
- A disclosure document was filed with the PTO office on February 18, 2000.

Ramifications/Test Description/Test Results : The feasibility prototype was a success. The source code to have a full working software, was written. Levi's, Kobe-Bryant, and Coca-Cola commercials were used. The test was a partial success (not full working model).
